**Project: Factory Application onto Residential Glass**  
**Title: John Evemy's House**  
**Date: 1991 (Onsite Reapplication in 2005)**

After 14 years of benefiting from ClearShield Low-M (Low-Maintenance) Glass® windows and doors, a Basingstoke householder knows just how effective it is. And when the time came to reapply the treatment, the owners had no hesitation in giving Ritec the opportunity to demonstrate again the clear benefits of the product.

New windows and doors were fitted by Zenith in 1991, with the glass pre-treated with ClearShield to provide surface protection from the damage caused by weathering and contamination. Recently, John Evemy, who lives at the four-bedroom house with his wife, noticed that the windows were not as sparkling or easy to clean and realised that it was time to reapply ClearShield after almost 15 years.

Impressed with the easy-to-clean benefits and durability of ClearShield, John called Ritec UK about retreatment. Ritec were happy to go onsite and apply the ClearShield System on the glass.

**After 14 years of ClearShield, the reapplication restored the glass to its 'as-new' condition**

**"ClearShield is an excellent product. If anyone asked me I would certainly recommend it!" says John Evemy**

The house had around 15 windows and doors to treat, including French doors at the back, and front and back doors with glass panels.

Today, there is no reason to ignore the need for protection of glass against corrosion and chemical attack, as the affordable technology exists that enables glass to keep its promises of clarity, visibility and cleanliness. ClearShield can be applied in the factory using either manual or fully automatic spraying equipment or, as in this case, onsite as part of Ritec's award-winning ClearShield System.

A delighted John now has Low-M Glass once more and is a great fan of ClearShield. Not only was the glass restored to its 'as-new' condition, he immediately noticed how much easier it was to clean too.

"It's an excellent product," says John. "If anyone asked me I would certainly recommend it!"
