# ClearShield Low-M<sup>®</sup>, Anti-Microbial Glass<sup>™</sup>...

- resists staining from hard water deposits
- is easier to clean
- does not support the growth of bacteria
- eliminates the need for harsh and abrasive cleaning products

**ClearShield<sup>®</sup> is proven to keep glass hygienically clean by reducing bacteria growth!**

*Micrograph of cells of staphylococcus aureus adhering to glass slides after washing*

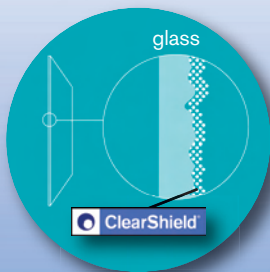

## **FACT: Shower glass gets dirty**

Glass is a sensitive material that reacts with its environment. Soaps, body fats, salts and minerals (limescale) can quickly build up on your shower glass. Over time, unprotected glass suffers permanent bonding of these residues, causing staining and physical damage. This is why water spots become very difficult, if not impossible to remove, no matter how hard you try! Regular washing will simply not remove them, spoiling the appearance and hygienic environment of your shower.

## **What is ClearShield<sup>®</sup> and why does it work?**

ClearShield<sup>®</sup> is a unique polymer that chemically bonds to ordinary glass, upgrading it to **ClearShield Low-M<sup>®</sup> (Low-Maintenance), Anti-Microbial Glass<sup>™</sup>**. Low-M<sup>®</sup> Glass is durable and 'non-stick', stopping limescale and other residues from building up on the glass surface, reducing maintenance by 50% on average.

Cleaner glass is greener glass<sup>™</sup>
